Education

The University of Chicago

PhD in Public Policy

Chicago, IL

Sept 2022 - Current

- Energy and Environmental Economics Area of Focus
- Primary Research Interest: Applications of Machine Learning Weather Forecasts
 - Focus on developing and training task specific weather forecasts for applications in energy and agriculture.
- Secondary Research Interests: Energy Economics, Agricultural Economics, Applied Industrial Organization

Carleton College

BA in Economics and Mathematics

Northfield, MN

Sept 2016 - June 2020

- Graduated cum laude with High Honors in Economics

Work Experience

The University of Chicago Booth School of Business

Research Professional

Chicago, IL

July 2020 - Aug 2022

- Worked under Professor Eric Zwick at Booth and Professor Owen Zidar from Princeton
- Worked primarily on a project coauthored with Raj Chetty and John Van Reenen that studies how discrimination has kept underrepresented groups from becoming entrepreneurs and the role public policy could play in addressing this inequality
- Implemented causal research designs using matching, instrumental variables, and event studies

Carleton Economics Department

Research Assistant and Co-Author

Northfield, MN

Sept 2019- June 2020

- Worked with Professor Aaron Swoboda to analyze the effect of light rail transit on housing prices in St. Paul, Minnesota
- Used R to clean data and analyze it using geographic weighted regression methods
- Created GIS model to calculate network walking distances from properties to the nearest light rail stop
- Helped to draft and submit paper to an academic journal as a coauthor and then work through the subsequent revision request.

Franklin Templeton Investments

Global Macro Research Intern

San Mateo, CA

June 2019- Aug 2019

- Created an independent research report on the macroeconomic state of Nigeria with an emphasis on natural resource management and sustainable growth
- Collected data from disparate sources to estimate how Nigeria's reliance on crude oil will shape it's development and what major climate risks are facing Nigeria.
- Used this data alongside political and social trends to create a presentation on the predicted growth and development of Nigeria

Carleton College Theater Shop

Technical Theater Assistant

Northfield, MN

Sept 2016- Mar 2020

- Worked with other student workers to build sets, and create lighting plots for the theater departments shows.
- Learned carpentry and electrical work

Teaching History

UChicago Harris

PhD Math Camp TA: Summer 2023, 2025, Economics of Regulation TA: Winter 2024, 2025, Spring 2025, Data and Programming II Python: Head TA Fall 2024

Carleton College

Intermediate Price Theory TA: Fall 2019, Winter 2020, Math Tutor: Fall 2018 and Winter 2019

Personal

Programming Languages

Python, R, Stata, Basic SQL, Basic SAS

Academic Interests

Scientific Machine Learning, Environment and Energy Economics, Agriculture, Remote Sensing, Causal Inference

Personal Interests

Bird Watching, Music, Running, Cats
